BLDRCODE LAB

TUTORIAL 1
INTRODUCTION TO WEBSITES

Hosting Your Website with GitHub Pages

Build your own website and change the theme with CSS
Build. Learn. Create.

What We Will Build

Today's Goal!

You will learn how to:

- Create a simple website
- Host it online for free
- Upload your Python tutorial slides
- Change the website design using CSS

We will use:
GitHub Pages

What is Github Pages?

GitHub Pages allows you to:

- Host websites for free
- Share projects online
- Create personal websites
- Publish coding tutorials
- Build portfolios

Your website will look like: https://yourname.github.io/bldrcode-lab

Github Pages

Three Easy Steps to Get Started

Step 01

Go to github.com
Steps:

1. Click Sign Up
2. Create account
3. Verify email
4. Log in

Step 02

Click “New Repository”. Give it a name.

Step 03

Click Add File → Create new file.

index.html

```
```

LET'S WRITE OUR FIRST HTML! HERE'S A SIMPLE EXAMPLE:

```
<h1>Welcome to My Python Website</h1>
<p>This is my first website.</p>
```

Go to:
Settings → Pages
Select: Deploy from main branch

Click Save.
Your website will appear at:

https://yourname.github.io/[your repository name]

Refresh after 30 seconds.
Your site is now live.

Wrap Up

Next Steps

Thank You for Joining BLDRCODE Lab!
